

FSM Adhesive

Facade membrane adhesive

Application

- Sealant and adhesive in one - provides a permanent waterproofing solution for window reveal joints and any penetrations in structures behind the building facade.

Key Features

- Sealant and adhesive in one - simple to use
- Will adhere to most construction materials including EPDM membranes, bituminous substrates, acrylic, glass, steel, stone, concrete, aerated concrete, lead, timber
- No need for any primer or thinners
- Water resistant and flexible
- Full cure within 24 hours

Installation

- The substrates must be clean, free of oil and greases, and dry. Wet substrates or substrates covered with dew must be dried by means of hot air before bonding.
- Apply the adhesive in strips onto the substrate by means of a cartridge gun, then after a minute place the EPDM membrane onto the adhesive and press down firmly with a roller. When bonding vertically, in some cases it may be necessary (depending on the weight of the membrane), to detach it for a moment after applying the adhesive-sealant and pressing down the membrane, and then place it again and pressing down firmly.

Facade membrane adhesive

Facade membrane adhesive

Paste Adhesive	Properties
Base	Adhesive based on a synthetic rubber
Colour	Black
Flash Point	0°C
Viscosity (at 20°C)	4500 +/- 2000 Pa.s
Dry Solids (at 20°C)	78 +/- 2%
Density (at 20°C)	1200 +/- 50kg / m ³
Shelf Life	9 months if stored in unopened original packaging
Packaging	600ml sausage - 12 units/box
Storage	Store in original unopened containers at temperatures between 15-25°C. Keep the material out of direct sunlight until ready for application
Precautions	<ul style="list-style-type: none"> Avoid open fires or other sources of ignition Do NOT SMOKE when using

Code	Size	Description	Box Quantity
FSM ADHESIVE	600cc	Dark Grey	12

FSM Adhesive

Code	Description	Box Quantity
CARTRIDGE GUN - 600cc	Application gun for FSM system	1
CARTRIDGE GUN NOZZLES - WIDE	Nozzles for above application gun	2
